

# I2EN Master Class on Strategic Fundamentals for New Nuclear

 **Date:** June 8 to 12, 2026

 **Location:** Paris, France

## Key benefits for participants

As global interest in nuclear energy surges, policymakers face critical challenges in initiating and structuring a successful nuclear program, securing funding, and navigating complex regulatory and industrial demands. By incorporating concrete examples and drawing on France's well-established nuclear expertise, this Master Class provides a comprehensive and practical understanding of the challenges and their solutions.

Through high-level discussions, presentations of real-life case studies and practical insights from leading French experts, participants will gain an **in-depth, strategic understanding** of the key factors that lead to successful nuclear projects. The program offers essential knowledge on regulatory frameworks, financing mechanisms, industrial partnerships, supply chain development and risk mitigation—ensuring that participants leave with **concrete strategies** for achieving their national or corporate nuclear ambitions.

## Who should participate?

The exclusive I2EN Master Class is designed for current or future leaders, whether governmental, industrial, or institutional, from countries initiating or expanding a nuclear energy program, including:

- Government officials and policy-makers developing national nuclear strategies;
- Current or future executives from utilities, industry, and investment firms;
- Regulators and financial institutions assessing the viability of nuclear projects;
- Advisors and decision-makers involved in major nuclear energy programs

This is a **high-impact**, executive-level course designed for those responsible for making key strategic decisions in the nuclear sector.

**Are you interested in this course?** Click on the “Sign up” link and fill in the form. A brochure is also available for further information.

## Registration fees and information

The registration fee is €1,920 incl. VAT. A discount is available for certain institutions, governmental organizations, or for countries wishing to register a multi-participant delegation (please [contact us](#)).

These fees include the training course, the industrial excursion, lunches and the Master Class cocktail reception. Participants are responsible for their own travel and accommodation costs. I2EN offers preferential rates at certain hotels (details to follow).

Master Class courses will be held at Tour Alto (La Défense, Paris), near the Esplanade de La Défense metro station on line 1. You can consult the access map [here](#).

This Master Class will be conducted entirely in English.
