**Hosted by the**

**Government of the Republic of Korea**

**through the**

**Korea Institute of Nuclear Nonproliferation and Control; Division of Nuclear Control Implementation**

**24 August - 4 September 2026**

**Ref. No.: EVT2505021**

## **Information Sheet**

### **Introduction**

The course is open to 25 participants from States in all regions with safeguards agreements in force that are considering introducing nuclear power or expanding their existing nuclear power programmes.

### **Objectives**

The course will provide participants with a basic understanding of the non-proliferation regime and with practical knowledge and skills required for safeguards implementation by State Systems of Accounting for and Control of nuclear material (SSACs), which are a crucial part of the national infrastructure necessary to establish and maintain a successful nuclear power programme. After completing this course, participants should be able to: describe the safeguards obligations associated with the introduction of nuclear power; describe the key safeguards-related activities of the State authority and the Nuclear Power Plant (NPP) owner/operator during project development, construction and commissioning; and plan the development or enhancement of State safeguards infrastructure for a nuclear power programme, drawing on international experience and resources as needed.

## Target Audience

This course is principally for advisers, managers and specialists in government, industry and regulatory bodies in Member States interested in introducing or expanding nuclear power programmes. It may be of particular interest to individuals responsible for safeguards implementation at both State and project/facility levels. All participants should have basic knowledge of the Treaty on the Non-Proliferation of Nuclear Weapons, the model Comprehensive Safeguards Agreement (INFCIRC/153 (Corrected)) and the model Additional Protocol (INFCIRC/540 (Corrected)). To receive maximum benefit from the course, participants should be, or expect to be, employed in safeguards, nuclear materials accountancy, or in import/export of nuclear material in their home States. There should be reasonable assurance that, on their return, they will be engaged in work related to the design, establishment, management, maintenance or strengthening of the SSAC. Member States are strongly encouraged to identify suitable female participants.
