

World Nuclear Association
CORDEL Workshop Korea 2024
21-23 May 2024, Busan, Korea

Accelerating nuclear deployment through international cooperation

Under the theme Accelerating nuclear deployment through international cooperation, the 5th CORDEL Regional Workshop will gather leading industry players together in Busan, Korea. Hosted by KHNP and KEPCO E&C, the workshop will focus on how all stakeholders in the nuclear sector can cooperate to deliver the ambition of tripling nuclear energy capacity. It will notably draw from the successful delivery of the Barakah nuclear power plant project alongside other international cooperation activities to understand good practice and share lessons learned for other export projects.
