The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **Training Workshop on the Spent Fuel and Radioactive Waste Inventory Tool** (hereinafter referred to as "event") to be held virtually via Cisco WebEx from **22 to 26 July 2024**.

The purpose of the event is to promote knowledge exchange among existing users of the IAEA's Spent Fuel and Radioactive Waste Inventory Tool (SWIFT). Participants will share experiences and lessons learned, as well as providing feedback on the system. The event also aims to demonstrate the functionalities, utility and benefits of using SWIFT to establish and maintain a comprehensive inventory of radioactive waste, including spent fuel and disused sealed radioactive sources declared as waste. Member States who have yet to adopt the system will have the opportunity to explore and understand its value and consider utilization.

The attached Information Sheet provides further details of the event.

The event will be held in English.

Member States are invited to designate or one or more participants for this event. Member States are strongly encouraged to identify women participants.

Designations should be submitted to the IAEA via the InTouch+ platform (<https://intouchplus.iaea.org>) through the competent national authority (Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) not later than **15 May 2024**, as indicated in the enclosed Information Sheet.

The Scientific Secretary of the event will liaise with the participants directly concerning further arrangements, as appropriate, once the official designations have been received.

The IAEA takes no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a "Disabling Code").

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.
