The Secretariat of the International Atomic Energy Agency (IAEA) presents its compliments to the IAEA's Member States and has the honour to draw their attention to the **International Conference on Effective Nuclear and Radiation Regulatory Systems: Strengthening Competence, Agility, and Connection in the Modern Era** (hereinafter referred to as "event") to be held at the IAEA's Headquarters in Vienna, Austria, from **27 to 30 April 2026**.

The purpose of the event is to build on the conclusions and deliberations of the previous conferences, and to consider developments in regulatory systems to further enhance global nuclear safety and security. The event will play a vital part in the global efforts of senior nuclear and radiation safety and nuclear security regulators to review, identify and propose a path forward to address issues that are important to the global nuclear regulatory community.

The event will be held in English.

Member States are invited to disseminate the attached Announcement and Call for Papers to the target audience for the event and to designate participants using the InTouch+ platform, as indicated in Section H. Member States are strongly encouraged to designate women participants.

The IAEA is generally not in a position to bear the travel and other costs of participants in the event. The IAEA has, however, limited funds at its disposal to help meet the cost of attendance of certain participants. Upon specific request, such assistance may be offered to normally one participant per country, provided that, in the IAEA's view, the participant will make an important contribution to the event.

Applications for financial assistance, as well as submissions of papers, can only be considered if received via InTouch+ by the deadlines indicated in Section O of the Announcement and Call for Papers.

It should be noted that compensation is not payable by the IAEA for any damage to or loss of personal property. The IAEA also does not provide health insurance coverage for participants in events. Arrangements for private insurance coverage on an individual basis should therefore be made. The IAEA will, however, provide insurance coverage for accidents and illnesses that clearly result from any work performed for the IAEA.

The Secretariat of the International Atomic Energy Agency avails itself of this opportunity to renew to the IAEA's Member States the assurances of its highest consideration.
