

Opening of applications for the Decomplex Executive Training Programme

Dear ENSREG members and observers,

We would like to inform you about that applications are now open for the **Decomplex Executive Training Programme** - an **innovative Master level Executive Training Programme**, with its corresponding University Diploma, designed specifically to address the **challenges of managing complexity in Nuclear Decommissioning Projects** (NDP). The programme aims to provide participants with a deeper understanding of the multifaceted aspects of decommissioning and equip them with the tools to enhance safety and efficiency throughout the project lifecycle.

Please share this information with your teams and colleagues as appropriate.

What is Decomplex?

Decomplex is a European cutting-edge initiative developed as part of the DMA²LSE (Decommissioning Management and Leadership for Safety Education) project, led by Université Côte d'Azur (France). This programme is co-funded by the European Union through the Instrument for Nuclear Safety Cooperation (INSC).

It offers a science-based approach that integrates the latest findings from management and social sciences, enabling participants to better navigate the challenges that arise in high-risk complex decommissioning projects.

Who Should Apply?

The Decomplex Executive Training Programme is aimed at professionals in the nuclear sector, particularly those in junior to middle management positions, including in regulatory organisations.

For the 2025-2026 session, we are pleased to announce that a total of 15 grants will be made available to trainees from countries benefiting from the European Instrument for International Nuclear Safety Cooperation (INSC). These grants will cover tuition fees, travel costs, and living expenses for the two-week face-to-face session, scheduled to take place at the University Côte d'Azur in Nice, France, beginning of January 2026.

To send in your application (**deadline 6 June 2025**) please click here:
