Afternoon	Return to hotel
Evening	Farewell dinner (self-funded)
Day 7	9-Nov-26 (Monday)
Morning	Breakfast (hotel)
During the day	Check-out & departure

¹ Daily programme, field activities and sites to be visited each day will be determined by the Technical lead based on the proceedings of the exercise, status of the “inspection” and suitability. It is expected for all these activities to take place either at the BoO and/or within the exercise area (Swakopmund/adjacent Erongo region).

² Debrief will provide a structured overview of a day’s activities and an opportunity to consolidate and reflect on the observations from the field. Topical sessions will offer an in-depth, interactive exchange with experts from teams participating in the exercise (IT, ISP, ET, SCT) through a moderated Q&A format. They will provide practical insight into the roles and responsibilities of each team as well as on how the different exercise/inspection components are planned, coordinated and implemented in practice.

³ The programme for Sunday 8 November will be decided based on the progress of the IFE26. Participants may be given a possibility to opt for a visit of the inspection/exercise area with the support from members of the scenario control team to better understand what it had in mind when planning the IFE26. Alternatively, an optional cultural activity or excursion may be offered.
