The Secretariats of the Food and Agriculture Organization of the United Nations (FAO) and the International Atomic Energy Agency (IAEA) (hereinafter referred to as the “Sponsoring Organizations”) present their compliments to the Sponsoring Organizations’ member countries and have the honour to draw their attention to the **Training Workshop on Methods and Workflows for Establishing Genetic Associations Using Functional Genomic Tools for Mutation Breeding Applications** (hereinafter referred to as “event”) to be held virtually via Microsoft Teams from **20 to 21 November 2025**.

The purpose of the event is to build the capacity of researchers in Member States for using functional genomic approaches for trait utilization in mutation breeding pipelines.

The attached Information Sheet provides further details of the event.

The event will be held in English.

Sponsoring Organizations’ member countries are invited to designate one or more participants for this event. Member countries are strongly encouraged to identify women participants.

Designations should be submitted to the IAEA via the InTouch+ platform (<https://intouchplus.iaea.org>) through the competent national authority (Ministry of Foreign Affairs, Permanent Mission to the IAEA or National Atomic Energy Authority) not later than **30 September 2025**, as indicated in the enclosed Information Sheet.

The Scientific Secretary of the event will liaise with the participants directly concerning further arrangements, as appropriate, once the official designations have been received.

The Sponsoring Organizations take no responsibility for, and the provider of the virtual meeting services has represented and warranted that the Services shall not contain, and that no end user shall receive from the software used to hold the virtual meeting, any virus, worm, trap door, back door, timer, clock, counter or other limiting routine, instruction or design, or other malicious, illicit or similar unrequested code, including surveillance software or routines which may, or is designed to, permit access by any person, or on its own, to erase, or otherwise harm or modify any data or any system, server, facility or other infrastructure of any end user (collectively, a “Disabling Code”).
